MADE IN BELGIUM

SINCE 1968

ROBLAND is a privately owned Belgian company, that was founded in 1968 by Robert Landuyt. The first successes were achieved by building affordable qualitative universal woodworking machines, a large part of which are still in use today.

We do have all resources and competencies in house for product development, parts manufacturing, product assembly, sales and after sales support.

With our state of the art, highly automated, parts manufacturing machines we are able to remain cost effective while manufacturing in Belgium near the historical city of Bruges. Although our machines will last for years, this is not enough for us. A quality service and after sales support is key to ROBLAND's success. As we manufacture all machine parts ourselves, you can rely on spare parts always being rapidly available.

Our company mission is to offer woodworking machines with the best quality/price ratio to the high end Do-It-Yourself market and to the small and medium-sized enterprise market.

Our product portfolio, aimed at the second wood processing, includes panel saws, table saws, universal machines, planers, thicknessers, spindle moulders, horizontal mortisers, a semi-automatic boring machine, a CNC boring machine, edgebanders and dust extraction systems.

We have an international dealer network and currently export over 85% of our production worldwide to more than 100 countries. In its 20.000 m² large factory ROBLAND employs over 80 people.

(C/F)Z SERIES

DIFFERENT SAW DIAMETERS

In 2018 ROBLAND launched a new series of panel saws on the basis of different saw diameters, sliding tables and executions. Here you have an overview:

(C/F)Z300 Series

Maximum saw blade diameter: 315 mm

(C/F)Z400 Series

Maximum saw blade diameter: 400 mm / 350 mm with mounted scoring blade

(C)Z500 Series

Maximum saw blade diameter: 500 mm / 350 mm with mounted scoring blade

SLIDING TABLE PROFILE 300 SERIES

- Balls on steel bar system (BOSS)
- 6 Years warranty
- 30 steel ball bearings

Available in lengths 2200 / 2800 / 3200 mm
Cutting lengths: 2500 / 3100 / 3500 mm

SLIDING TABLE PROFILE 400/500 SERIES

- Balls on steel bar system (BOSS)
- 6 Years warranty
- 30 steel ball bearings

Available in lengths: 1595 / 2200 / 3200 / 3800 mm
Cutting lengths: 1600 / 2500 / 3500 / 4100 mm

(C/F)Z SERIES

DIFFERENT EXECUTIONS

MANUAL (M)

Manual height and tilt adjustment of the saw blade with analogue read-out of inclination of the saw blade.

Option on CZ300 II.

ELECTRIC (EL)

Electrical height and angle adjustment of the saw blade.

Here pictured with the optional digital read-out of height and inclination of the saw blade.

1 AXIS CONTROL (X1)

Overhanging control panel with:

- 7" state of the art touch screen for numerical control of position of the parallel fence and read-out of height and inclination of the saw blade.
- Push buttons for:
 - Start/stop of the saw blade and scoring blade
 - Height and inclination of the saw blade
 - Emergency stop
- Clipboard for instructions

3 AXIS CONTROL (X3)

Overhanging control panel with 7" state of the art touch screen controlling the position of the parallel fence as well as the height and angle adjustment of the saw blade.

- Push buttons for:
 - Start/stop of the saw blade and scoring blade
 - Emergency stop
- Clipboard for instructions

Z SERIES

ROBLAND offers you the choice of different **outrigger tables** on the Z series.

Z300, CZ & FZ

Basic outrigger table (970 x 540 mm) with slanting telescopic cross-cut fence. (1565 - 2550 mm)

Z400

Large outrigger table (1420 x 650 mm²) with slanting telescopic cross-cut fence (2295 - 3000 mm).

Also available as an option on Z300 & CZ.

Z400 COMF

Large outrigger table with extension and slanting telescopic cross-cut fence (2295 - 3000 mm). The index system with length correction facilitates accurate sawing of angles and mitre cuts.

Available as an option on Z300, Z400 & CZ.

Z500

Luxury outrigger table (1505 x 760 mm²) with extensions in length and width and slanting telescopic cross-cut fence (2295 - 3355 mm). The index system with length correction facilitates accurate sawing of angles and mitre cuts.

Also available as an option on Z400.

TORSION TUBE

A torsion tube filled with concrete offers increased rigidity to the frame, absorbs vibrations and functions as a counterweight for the load on the sliding table.

ALUMINIUM SLIDING TABLE WITH BOSS

The aluminium sliding table is completely anodized for better hardness and rust protection. The surface of the sliding table of the (C)Z400 and (C)Z500 is the widest in the industry (426 mm). The Robland bearing system with hard balls on hardened steel round bars (BOSS) and automatic cleaning system ensures a smooth operation.

On every available panel saw of any brand a too hard impact on the carriage inflicts an imprint on the lower profile. On any other sliding table, the upper profile has to be dismantled and has to be fixed in a complex way. Thanks to the BOSS-system, the end user can turn the steel round bars himself to obtain a new rolling surface. This way you can enjoy a perfect course of your table for many years.

CAST IRON TABLES

Our cast iron tables have a honeycomb structure for the highest strength per weight ratio. The surface is scraped. This technique with low energy dissipation guarantees a very flat surface. Microgrooves are applied for easy gliding of the wooden workpiece on the cast iron table.

OVERHANGING SAW GUARD

For optimal safety and dust extraction, the overhanging saw guard (optionally available as of CZ300, standard as of Z400 CE) mechanically adjusts to the height of the workpiece. The arm is easy to turn away.

On models with a cutting width of 1500 mm between saw and parallel fence, the angled support arm allows the cross cut of longer workpieces with a width of up to 850 mm, perfect for kitchen worktables.

STRENGTHS

SPECIFIC TO THE **CZ**, **FZ** & **Z** SERIES

WELDED STEEL SAW AGGREGATE ON **CZ300 II** & **FZ-SERIES**

This new welded steel saw aggregate offers a better precision and dust extraction than was available on the legendary **Z3200** series.

OPTIMIZED SAW AGGREGATE ON **CZ400/500 SERIES** & **Z** SERIES

The saw aggregate is made out of one piece in cast iron for natural absorption of vibrations and offers more precision and stability. Its aerodynamic design allows for optimal dust extraction. The heavy, cast-iron sawing unit rotates on large shells.

The system is maintenance-free and guarantees lifelong accuracy as well as smooth movements.

DIGITAL READ-OUT

The Double Digital Flippers (DDF) system allows for a digital read-out of the position along the full length of the first part of the outrigger fence. It increases both ease of use and accuracy. The right flipper is used for measurements close to the sawblade while the left flipper allows to measure larger panels.

MOTORIZED PARALLEL FENCE

The control of the movement of the parallel fence on a ball screw allows for its very accurate positioning (X1 and X3 versions)

LED STRIP WARNING

On the **Z500** models a led strip lights up near the scoring blade when it is in use. This is also available as an option on the **CZ400**, **CZ500** & **Z400** models.

OPTIONS

DIGITAL READ-OUT **NXZ** & 300 SERIES

Digital read-out on parallel fence with micro adjustment. This increases the ease of use and accuracy.

DIGITAL READ-OUT (400/500 SERIES)

Digital read-out on parallel fence with micro adjustment. This increases the ease of use and accuracy.

This digital read-out is also available on the **Z300** when it is equipped with the optional **Z400** parallel fence.

DIGITAL READ-OUTS (300/400 SERIES)

The Double Digital Flippers (DDF) system allows for a digital read-out of the position along the full length of the first part of the outrigger fence. It increases both ease of use and accuracy. The right flipper is used for measurements close to the sawblade while the left flipper allows to measure larger panels.

This digital read-out is also available on the **Z300** when it is equipped with the optional **Z400** parallel fence. On the **Z400** it is possible to have a second digital read-out on the telescopic part.

DIGITAL READ-OUTS (500 SERIES)

Digital read-out on flippers. Increases ease of use and accuracy. Through its large size it allows for continuity from base profile to extension. The telescopic part of the profile also has a digital read-out.

PANEL SAWS

OPTIONS & ACCESSORIES

SCORING UNIT

- Optional on the **NXZ II** & **CZ300 II**
- Standard on the **FZ300**
- Diameter 120 mm, driven by separate motor on **CZ300 II** & **FZ300**

(Scoring blade is not included)

GROOVE CUTTER

On the **(C)Z400** and **(C)Z500** a preparation for groove cutter is optionally available.

Ability to cut a groove of max. 16 mm wide.

REMOTE START-STOP FUNCTION

Additional start-stop buttons for saw and scoring integrated in the sliding table for increased ease of use and safety.

OVERHANGING DUST EXTRACTION TUBE

An overhanging dust extraction tube can be mounted on the sawblade protection. It offers a standard dust extraction outlet of 100 mm.

(**NXZ II**, **CZ300 II**, **FZ300**, **Z300**)

SAW GUARD

Overhanging saw guard (**CZ300 II**, **FZ300** & **Z300**)

For optimum safety and dust extraction, the overhanging saw guard mechanically adjusts to the height of the workpiece. The arm is easy to turn away.

ACCESSORIES

MITRE FENCE

Mitre fence with wood clamp.

Double sided mitre fence.

ADJUSTABLE SCORING BLADE

“LEADER” scoring blade with adjustable width to match the main saw.

SUPPORT TABLES

Extra support table

Can be positioned anywhere along the aluminium profile of the sliding table. Together with the outrigger table it offers a better support for large panels.

Extra support table with rip fence on ruler for long narrow strips.

Can be positioned anywhere along the aluminium profile of the sliding table. Together with the outrigger table it offers a better support for large panels.
